Asmaco Spray Paint Msds Pdf 213 ausgabe ubersetzter Platelet function studies using platelet factor 4 activation of prekallikrein. Human platelet factor 4 (PF4) has been

found to be the most potent of several thrombin-induced activators of the plasma protease cascade. We have tested PF4 for its ability to activate purified prekallikrein (precursor of kallikrein) and to stimulate the release of arachidonic acid and serotonin (a potent platelet aggregating substance).

Activation of prekallikrein by PF4 was demonstrated by the time course of activation of the prekallikrein and kallikrein in the presence of the substrate S-2266 and also by the development of a reactive thiol ester on the prekallikrein molecule. PF4 has no effect on the aggregation of human

platelets.  $\epsilon(t)$  for  $t > 0$  and some  $C > 0$  and  $R > 0$  are independent of  $m$ . This finishes the proof of our lemma. [99]{}
