Although OCR Smartphones have been around for some time, OCR Tablets are still in an early stage. However, some OCR applications are not meant for smartphones but rather for tablets and other mobile devices. Even though most apps are optimized to function on smartphones or tablets, we still recommend you to download the official apps that have been optimized for desktop computers with a mouse and keyboard. You might be even able to use an app like OCR Pro for your tablet device, although it might not be exactly the same as the official application. Here, we want to share with you our OCR tests in the tablet category. We have selected a selection of OCR apps that we believe to be the best. ODF to PDF Converter OCR Mobile Apps There are plenty of document converter apps for Android, iPhones and iPads in the iTunes or Google Play Store. However, to complete the full circle, the ODF to PDF converter is still an official app for smartphones. Since most document converters can only convert text to a PDF file, they can work pretty well for smartphones or tablets, but they can't deal with the conversion of complex formats such as XPS, DOCX or ODS. To make sure our readers are not stuck with bad or inefficient apps, we reviewed this app's latest version and we're quite impressed by its features. You can convert all type of documents for both Android and iOS devices. Also, the app has been optimized to take full advantage of your device's hardware and speed.
